

Features:	Wall-mounted scale, weighing from 1 g. to 2 kg (1/8 oz. to 4.40 lbs).
Operation:	
"PRESS"	By pressing "PRESS", the front will open and can smoothly be moved to 90 degrees.
Weighing function	When the front reaches its position and the scale displays 0, the scale is activated.
Unit of measurement	The scale is able to weigh in grams or pounds. Choose the unit by g/lbs.
ON/TARE	Is used for resetting the scale. Eg.: the weigh of a bowl is displayed, press TARE, the scale is now displaying 0, add an ingredient, and the weight of the last added ingredient is displayed. Continue untill the max of 2 kg is reached.
Finish weighing	The scale is closed by gently pushing the front back to normal position (closed).
Other features:	
AUTO switch off	If the scale is left unused for two minutes it is automatically switched off , even though the front is open. Press ON/TARE to activate the scale again.
Overload	When reaching the max. of 2 kg, "EEEE" is displayed. Immediately remove the subject.
Accuracy / graduation:	+/- 0,5% of the subject. 1 g. graduation.
Battery:	1 pcs. 9V battery. Alkaline recommended.
Dimensions:	288 x 239 x 55,5 mm.
Weight:	2110 g.
Error:	
Change battery.	
A negative value is caused by activating the TARE function and removing some ingredients. The negative value equals the weight of the removed ingredient. Press ON/TARE to reset the scale.
